

Maarten Waegeman

Web-Developer and generally curious being

I am a 29 year young individual from Opwijk in Belgium (close to Brussels). After finishing my studies in Applied Computer Sciences, I started my career as a Technical consultant.

In the past I have worked on projects for large organisations in both public and private sector, mostly in large teams. But I have also been part of a tight small team for a startup. The biggest kick, I get from finding the best solution to a problem and I am not scared of trying out new technologies. I am always keen on learning new things and I get things under my belt rather quickly.

I enjoy life and love to be around family and friends. I have a positive attitude and I enjoy a good joke once in a while although I am serious and professional when it counts. In my free time I enjoy reading, playing the trumpet and watching a good movie.

JOB EXPERIENCE

LEAD FRONTEND DEVELOPER: LIVE MANAGER, 2014 - 2017

At Live Manager I was responsible for the entire Frontend. My daily work included bugfixes, implementing new features and design changes, testing and deploying new builds. My biggest accomplishment at Live Manager was successfully implementing a new life-feed, social wall and an entire redesign of the site.

(HTML & CSS, JavaScript, Backbone & Marionette.js)

TECHNOLOGY CONSULTANT: HP, 2011 - 2014

As a Technology consultant, I worked on several projects for the Belgian and Flemish government. My responsibilities varied from project to project but included: Peoplesoft development and support, monitoring, user interface design and implementing and testing of change requests.

(Java, Peoplesoft, HTML & CSS, JavaScript, Oracle DB)

SOFTWARE ENGINEER (INTERSHIP): ECONOCOM N.V., 2010

With my internship partner I worked out several projects:

- Development of a custom Hardware inventory management software complete with a barcode scanner.
- Redesigned and added usability to A2Z's Tell Me More reporting website & sales tool.
- Rollout of Dell Management Console Software on a network with more than 1K nodes.

(HTML & CSS, JavaScript, MS SQL & .Net)

CONTENT ADMINISTRATOR (STUDENTJOB): OXYNADE, 2008 - 2009

I was responsible for configuring the inhouse crawler and parser tools, so event data could be harvested and processed from target event websites.

(HTML, PHP, Regex)

EDUCATION

ORACLE UNIVERSITY: PEOPLETOOLS DEVELOPER EXPERT CERTIFICATION, 2012

PeopleTools I & PeopleTools II
PeopleCode & Application Engine

UNIVERSITY COLLEGE GHENT: POSTGRADUATE, IT-MANAGEMENT, 2010 - 2011

Option Multimedia as specialisation.

UNIVERSITY COLLEGE GHENT: B.A.SC. APPLIED COMPUTER SCIENCE, 2007 - 2010

Passed with Second Class Honours
Internship at Econocom, passed with First Class Honours
Scripton "A trip through the modern enterpriseworld." (2010)

SKILLS

PROGRAMMING

I am experienced in PHP, JavaScript, Typescript, Java, PeopleTools and PeopleSoft. I have also programmed in .Net (C#) and have some basic knowledge of C++.

WEBTECHNOLOGY

I have experience in Web- and UI-design and development, consuming Webservices and working with version control, CI and deployment tools. Some of the tools I have used include HTML5 & CSS, PHP, PHPUnit, JavaScript, JQuery, Angular, Backbone, Karma, Grunt, GIT and Photoshop.

FRAMEWORKS

I am familiar with PHP frameworks such as Laravel and CodeIgniter. When developing in JavaScript I often use JQuery, Angular, Backbone, Marionette.js and others. I recently started learning React.JS.

DATABASES

I have experience with MS SQL, Oracle DB and MySQL. While developing, I have used the Active Record Pattern on multiple occasions. I have also used Hibernate in Java.

LANGUAGES

My native language is Dutch. I also have a full professional proficiency of English, a professional working proficiency of French and an elementary proficiency of German. I recently have started learning Danish.
